

Self-taught AI builder — learning from papers and courses since early 2026, I designed, built and evaluated **11 projects in three months**, spanning training-method research, multi-device AI systems, applied decision systems and shipped products.

SELECTED PROJECTS

Zero Gradient — 4.16B-param LM trained with no backpropagation RESEARCH
Trained a content-routed MoE LM with autograd globally disabled on one T4; a 5-phase study + controlled experiment proved the capability ceiling is architectural, not algorithmic. Paper draft + arXiv package.
[PyTorch](#) · [MoE](#) · [layer-local learning](#) · [WikiText-103](#)

Gemma4all — cross-device AI task system SYSTEMS
Schema-first (42 JSON schemas), event-sourced, local-first system; fail-closed human-in-the-loop approvals and a privacy-based routing engine across iOS/Android/macOS; on-device inference via LiteRT-LM on Metal GPU.
[TypeScript](#) · [Python](#) · [Swift](#) · [Kotlin](#) · [event sourcing](#)

TriageGeist — trustworthy ED-triage decision stack APPLIED ML
Found 99.7% label leakage and refused to exploit it; built a text-blind GBDT (QWK 0.93) + isotonic calibration + conformal uncertainty + bootstrap fairness audit + ops console. 12/12 tests.
[LightGBM](#) · [conformal prediction](#) · [calibration](#) · [fairness](#)

NeuroGolf (ARC-AGI) — minimal ONNX circuit compiler RESEARCH
Reframed a "neural golf" contest as program synthesis; reverse-engineered the scorer into a cost model and compiled true task rules into overfitting-proof integer-weight circuits validated on 3000+ samples.
[ONNX](#) · [program synthesis](#) · [scorer reverse-engineering](#)

Nemotron Post-training — post-training pipeline, 30B MoE reasoning model RESEARCH
Reproducible rule-teacher → CoT-SFT pipeline (EM 0.75; 30B MoE in 4-bit on one GPU, upstream cache bug patched, reward shaping); root-caused the training failure across six postmortems and designed the recovery route.
[Transformers](#) · [PEFT/LoRA](#) · [4-bit](#) · [GRPO reward shaping](#)

AI Showrunner — one sentence → subtitled vertical short film PRODUCT
Multimodal agent pipeline (script → storyboard → video generation) with a vision-model critic loop driving targeted retries and cross-shot character consistency; six end-to-end films produced.
[FastAPI](#) · [Qwen-VL critic](#) · [I2V/T2V](#) · [ffmpeg](#)

Also built: Offline French Companion (in-browser LLM tutor — WebLLM + Whisper + OCR, fully offline) · Orbit Wars (multi-agent evaluation methodology) · Maze Crawler (strategy agent + CI) · VoicelInput (pure-Swift macOS speech input) · Atelier Post (shipped art-to-Instagram tool, web/PWA/iOS).

EXPERIENCE

BNP Paribas · Global Corporate Banking
[Paris](#) · [Dec 2025](#) — Present
Cross-border transactional & financing solutions for multinational clients; built internal RAG knowledge bases (Open WebUI / Dify) for client-response efficiency.

HSBC · Global Markets, Liquidity
[Paris](#) · [Jun](#) — [Nov 2024](#)
Optimized short-term EMEA portfolios under LCR/NSFR; built VBA/Excel pricing & rate-tracking tools; contributed to the ALCM committee.

TikTok · Growth Strategy
[Beijing](#) · [Feb](#) — [May 2023](#)
10+ strategic projects (+23% SaaS/AI market share); SQL/Excel analytics for a 20+ team; +13% user conversion in one month.

Uber China · **DiDi** · Product & User Ops
[Beijing](#) · [Aug 2022](#) — [Jan 2023](#)
3 business-operations projects; Python/SQL/VBA analysis and predictive models for data-driven user strategies.

EDUCATION

ESCP Business School 2023 — 2026
MSc in Management, Finance · [Paris](#) & [London](#).

Beijing Intl Studies Univ. 2019 — 2023
BA Language & Culture (French, Japanese); minor New Media (CUC); self-taught Psychology (Yale/Coursera).

SKILLS

Programming: [Python](#) · [TypeScript/Node](#) · [Swift](#) · [Kotlin](#) · [JS](#) · [SQL](#) · [VBA](#)

AI / ML: [PyTorch](#) · [LoRA/PEFT](#) · [MoE](#) · [calibration](#) · [conformal prediction](#) · [LiteRT-LM](#) · [ONNX](#) · [WebLLM](#) · [Whisper](#) · [LLM/agent orchestration](#) · [schema-first](#) & [event-sourced systems](#)

Languages: [Chinese \(native\)](#) · [English](#) · [French \(fluent\)](#) · [Japanese \(working\)](#)

Strengths: high agency, self-taught zero-to-one builder — curious, reflective and resilient, with strong insight and a painter's eye, at home across cultures.
